

# Adult Summer Reading Program

## TAKE AND MAKE

### *Felt Summer Succulent*

*You will need scissors and white glue for this project*

- Remove the felt strips from your bag.
- Cut through the paper and felt along the printed pattern creating a strip of connected plant petals. Do not cut out the individual petals. Do this for both colors of felt.
- Remove the straight pins and the paper. Set the pins aside and throw away the paper pattern.
- Lay one felt piece out flat and draw a line of glue along the straight edge.
- Beginning at one end of your felt, roll it onto itself with the glue on the inside. Use a straight pin to help secure it.
- Repeat this with your second felt strip.
- When the glue is dry, remove the pin and arrange the petals.
- Fill your clay pot about halfway with some of the moss.
- Put glue on the bottom of each succulent's base and place in the clay pot.
- Tuck moss in around your succulent and spread your petals out.
- Stand back and admire your excellent work!
